07 · IN-APP AGREEMENT

Agreement screen at first login

The click-to-agree screen where restaurant users accept documents 02 to 06. It follows Indian clickwrap practice: an active tick by the person, the documents readable at that moment, plain words that the agreement is binding, and a record of who, when, which version and from which device.

Who sees it	Owner, Manager and Head Chef: at their first login, and again at their next login after any document gets a new version.
Where	Restaurant app, straight after login. The documents are also in Profile > Legal and on the website.
Language	The screen's own words are in the app's language (12 languages); the documents themselves are in English only.

[In yellow] blanks to fill in before launch · [to confirm] choices the drafter marked for confirmation

What the person sees

The screen comes straight after logging in and before anything else, the Owner's new PIN included. The server refuses every other request from the person until they have agreed (the "legal gate"), so nothing in the app can be used first. Each document in the list opens its full text. The boxes start unticked. "Agree and continue" is never greyed out: tapped before every box is ticked, it marks the box still to tick and says so.

OWNER, FIRST LOGIN (WORDING AS SHOWN; LAYOUT SIMPLIFIED)

Before you start

This is a binding agreement between [Restaurant name] and ECCS, which you make for your restaurant. Read the documents, then agree to continue.

- Terms of Service (opens the full text)
- Privacy Policy (opens the full text)
- Refund and Cancellation Policy (opens the full text)
- Data Processing Terms (opens the full text)

☐ On behalf of [Restaurant name], I agree to the Terms of Service, Refund and Cancellation Policy and Data Processing Terms.

☐ I have read the Privacy Policy and agree to my information being used as it describes.

These documents are in English for now. Ask ECCS if you need help understanding them.

Agree and continue | Not now

Under "Not now": "You need to agree to use the app." Tapping it logs the person out.

MANAGER OR HEAD CHEF, FIRST LOGIN

Before you start

This is a binding agreement between you and ECCS. Read the documents, then agree to continue.

- Terms of Service (opens the full text)
- Privacy Policy (opens the full text)

☐ I agree to the Terms of Service.

☐ I have read the Privacy Policy and agree to my information being used as it describes.

These documents are in English for now. Ask your Owner or ECCS if you need help understanding them.

Agree and continue | Not now

Other messages on this screen

When	The words
A document has a new version	We have updated our terms (as the title)
A document changes while the screen is open	A document has just been updated. Read it again, then agree. The boxes are unticked again.
"Agree and continue" with both boxes empty	Tick both boxes to continue.
With one box empty	Tick the box to continue. Beside the box: Tick this box to agree.
Later, in Profile	Legal documents: each document with "Agreed [date]", and "How to delete your account", which opens Privacy Policy section 18.

Who is asked

Person	Agrees to	How
Owner	Terms of Service, Refund and Cancellation Policy, Data Processing Terms (one box, on behalf of the restaurant); Privacy Policy (own box)	Two boxes
Manager, Head Chef	Terms of Service (one box); Privacy Policy (own box)	Two boxes
ECCS's own staff (Super Admin, Ops Manager, Supervisor, sales)	Nothing on this screen: these are the customer's documents	—
Restaurant employees without a login	Nothing on this screen. Face attendance has its own consent (document 08).	—

What is recorded for each document agreed

One record per document, kept by the server: the person, the document and its version, a SHA-256 fingerprint of the exact words agreed to, the time, the person's role, the restaurant and outlet, the language the app was in, the IP address, the browser or app identification string, the phone's name and the app's version. A record is never changed; agreeing to a new version adds a new one.

How versions work (the note kept beside the documents in the code)

A document's version is the date its wording came into force. Changing the version asks everyone who must agree to that document to agree again at their next login (or at once, if they are using the app): that is how a material change is made. Correcting a typing mistake does not need a new version. Each agreement stores a fingerprint (SHA-256) of the exact words agreed to, so keep every published wording in git history.
